Fall '01

Exercise #6

Exercises 5 at the end of chapter 5. *This is due Tuesday, Oct. 2, at the beginning of class.* If you have not yet installed the software on your own machine or don't have an appropriate machine, this can all be done on the u-cluster (which has both Vim and the JDK).

General rules about homework:

1. Turn in your homework by *email* before class. (My email address is hammond@u.arizona.edu.)
2. If an assignment includes code, you must turn in that code!
3. If you can't get your program to do what you want, that's unfortunate, but o.k. Regardless, *your code must run.*
