

Prospectus guidelines

1. The prospectus is due **Oct. 18**.
2. Typed, double-spaced, no more than **two** pages.
3. It should outline the kind of paper you intend to write for the seminar.
4. You should indicate what your hypothesis is.
5. You should indicate what theoretical framework your analysis will be couched in.
6. You should indicate where your data will come from. (Be as specific about this as possible.)
7. Your paper can treat any area of language you choose, but the paper should reflect to *some* degree the material we've covered in class, even if you want to argue that this material is irrelevant!
